

items used in the production of tobacco.

**§ 1463.105 Base quota levels for eligible quota holders.**

(a) The BQL is determined separately for each kind of tobacco for each farm for which a 2004 basic marketing year quota was established under part 723 of this title. Any marketing quota assigned by FSA to a new farm in 2003 or 2004, other than through transfer from another farm, shall not be considered when determining the BQL.

(b) For burley tobacco quota holders BQL is established according to the following table, except as adjusted under paragraph (e) of this section:

(1) Farm BQL. The 2004 basic quota, multiplied by the BQL adjustment factor 1.071295. (NOTE: The factor adjusts the 2004 basic quota to the 2002 basic quota level.)

(2) Quota holder BQL. The farm BQL multiplied by the quota holder's ownership share in the farm. (NOTE: In the case of undivided tract ownership, BQL must be distributed among the tract quota holders by the tract owners.)

(c) For flue-cured tobacco quota holders the BQL is established according to the following table, except as adjusted under paragraph (e) of this section:

(1) Farm BQL. The 2004 basic quota, multiplied by the BQL adjustment factor 1.23457. (NOTE: The factor adjusts the 2004 basic quota to the 2002 level.)

(2) Quota holder BQL. The farm BQL multiplied by the quota holder's ownership share in the farm. (NOTE: In the case of undivided tract ownership, BQL must be distributed among the tract quota holders by the tract owner.)

(d) For quota holders of all other kinds of tobacco the BQL is established according to the following table, except as adjusted under paragraph (e) of this section:

(1) Farm BQL. The basic allotment established for the farm in 2002 multiplied by the county average production yield. The following NASS yields are to be used for any county without production:

- (i) Fire-cured (type 21)—1746 lbs.
- (ii) Fire-cured (types 22–23)—2676 lbs.
- (iii) Dark Air-cured (types 35–36)—2475 lbs.

(iv) Virginia Sun-cured (type 37)—1502 lbs.

(v) Cigar Filler/Binder (types 42–44, 54, 55)—2230 lbs.

(2) Quota holder BQL. The farm BQL multiplied by the quota holder's ownership share in the farm. (NOTE: In the case of undivided tract ownership, BQL must be distributed among the tract quota holders by the tract owner.)

(e)(1) CCC will divide the BQL for the farm between the parties to the agreement as CCC determines to be fair and equitable, taking into consideration the proportionate amounts of cropland sold, if:

(i) On or before October 22, 2004, the owner of a farm had entered into an agreement for the sale of all or a portion of a farm for which a farm marketing quota was established for the 2004 marketing year; and

(ii) Such agreement had not been fulfilled or terminated prior to that date; and

(iii) The parties to the agreement are unable to agree to the disposition of the contract payment to be made with respect to the farm.

(2) If, on or before October 22, 2004, the owner of a farm had entered into an agreement for the permanent transfer of all or a portion of a tobacco marketing quota and the transfer had not been completed by such date, the owner of the farm to which such quota was to be transferred shall be considered to be the owner of the marketing quota for the purposes of this subpart. The BQL's for the transferring farm and the receiving farm will be adjusted to reflect this transfer.

(f) Any tobacco marketing quota preserved under part 1410 of this chapter as the result of the enrollment of a farm in the Conservation Reserve Program shall be included in the determination of the BQL of the farm.

**§ 1463.106 Base quota levels for eligible tobacco producers.**

(a) BQL is determined separately, for each of the years 2002, 2003 and 2004, for each kind of tobacco and for each farm for which a 2002 farm marketing quota had been established under part 723 of this title.

(b) The BQL for producers of burley tobacco is established as follows:

(1) The 2002-crop year BQL for burley producers is the 2002 effective quota pounds actually marketed, adjusted for disaster lease and transfer, and considered-planted undermarketings and overmarketings. The BQL is then multiplied by the producer's share in the 2002 crop to determine the producer's 2002 BQL. The adjustments for disaster lease and transfer and considered-planted undermarketings and overmarketings are made as follows:

(i) Disaster-leased pounds are added to the marketings of the transferring farm and deducted from the marketings of the receiving farm;

(ii) Considered-planted pounds are added to the farm's actual marketings, and includes only undermarketings that were not part of the farm's 2003 effective quota.

(iii) Pounds actually marketed as overmarketings and sold penalty-free are added to the farm BQL after the BQL adjustment factor of 1.12486 has

been applied to the overmarketed pounds.

(2) The 2003-crop year BQL for burley producers is the 2003 effective quota pounds actually marketed, adjusted for disaster lease and transfer and considered-planted undermarketings and overmarketings, as follows:

(i) Disaster leases are added to the marketings of the transferring farm and deducted from the marketings of receiving farm.

(ii) Considered-planted pounds are added to the farm's actual marketings, and includes only undermarketings that were not part of the farm's 2004 effective quota.

(iii) Pounds actually marketed as overmarketings and sold penalty-free are added to the farm BQL after the BQL adjustment factor of 1.071295 has been applied to the overmarketed pounds.

(iv) After these adjustments the BQL is calculated as follows:

Step	Calculation
1 .....	Subtract all 2002 undermarketings from the 2003 marketings, including undermarketings from the parent farm in any special tobacco combinations. Leased pounds are apportioned undermarketing history by dividing the transferring farm's undermarketings by the transferring farm's effective quota, before any temporary transfers, resulting in the percentage of undermarketings that were leased.
2 .....	Multiply the 2003 marketings remaining after Step 1 times 1.12486 (the 2003-BQL adjustment factor).
3 .....	Add the undermarketings that were subtracted in Step 1 to the sum of Step 2 to determine the farm 2003 BQL.
4 .....	Multiply the sum from Step 3 times the producer's share in the 2003 crop to determine the producer's 2003 BQL.

(3) The 2004-crop year BQL for burley producers is the 2004 effective quota be-

fore disaster lease and transfer is calculated as follows:

Step	Calculation
1 .....	Subtract all 2003 undermarketings from the 2004 effective quota, including undermarketings from the parent farm in any special tobacco combinations. Leased pounds are apportioned undermarketing history by dividing the transferring farm's undermarketings by the transferring farm's effective quota, before any temporary transfers, resulting in the percentage of undermarketings that were leased.
2 .....	Multiply the 2004 effective quota remaining after Step 1 times 1.071295 (the 2004 BQL adjustment factor).
3 .....	Multiply the undermarketings that were subtracted in Step 1 times 1.12486 (the 2003 BQL adjustment factor).
4 .....	Add the effective quota from Step 2 to the undermarketings in Step 3 to determine the farm 2004 BQL.
5 .....	Multiply the sum from Step 4 times the producer's share in the 2004 crop to determine the producer's 2004 BQL.

(c) The BQL for producers of flue-cured tobacco is established by year, as follows:

(1) The 2002-crop year BQL for flue-cured producers is the effective 2002 quota actually marketed, adjusted for disaster lease and transfer and considered-planted undermarketings and overmarketings. The BQL is then multiplied by the producer's share in the 2002 crop to determine the producer's

2002 BQL. Adjustments for disaster lease and transfer and considered-planted undermarketings and overmarketings are calculated as follows:

(i) Disaster-leased pounds are added to the marketings of the transferring farm and deducted from the marketings of the receiving farm;

(ii) Considered-planted pounds are added to the farm's actual marketings, and include only undermarketings that

**Commodity Credit Corporation, USDA****§ 1463.106**

were not part of the farm's 2003 effective quota.

(iii) Pounds actually marketed as overmarketings and sold penalty-free are added to the farm BQL after the BQL adjustment factor of 1.10497 has been applied to the overmarketed pounds.

(2) The 2003-crop year BQL for flue-cured producers is the 2003 effective quota actually marketed, adjusted for disaster lease and transfer and considered-planted undermarketings and overmarketings, as follows:

(i) Disaster leases are added to the marketings of the transferring farm

and deducted from the marketings of the receiving farm.

(ii) Considered-planted pounds are added to the farm's actual marketings, and includes only undermarketings that were in not part of the farm's 2004 effective quota.

(iii) Pounds actually marketed as overmarketings and sold penalty-free are added to the farm BQL after the BQL adjustment factor of 1.23457 has been applied to the overmarketed pounds.

(iv) After these adjustments the BQL is calculated as follows:

Step	Calculation
1 .....	Subtract all 2002 undermarketings from the 2003 marketings, including undermarketings from the parent farm in any special tobacco combinations.
2 .....	Multiply the 2003 marketings remaining after Step 1 times 1.10497 (the 2003 BQL adjustment factor).
3 .....	Add the undermarketings that were subtracted in Step 1 to the sum of Step 2 to determine the farm 2003 BQL.
4 .....	Multiply the sum from step 3 times the producer's share in the 2003 crop to determine the producer's 2003 BQL.

(3) The 2004-crop year BQL for flue-cured producers is the 2004 effective quota before disaster lease and trans-

fer. The 2004 BQL is calculated as follows:

Step	Calculation
1 .....	Subtract all 2003 undermarketings from the 2004 effective quota, including undermarketings from the parent farm in any special tobacco combinations.
2 .....	Multiply the 2004 effective quota remaining after Step 1 times 1.23457 (the 2004 BQL adjustment factor).
3 .....	Multiply the undermarketings that were subtracted in Step 1 times 1.10497 (the 2003 BQL adjustment factor).
4 .....	Add the effective quota from Step 2 to the undermarketings in Step 3 to determine the farm 2004 BQL.
5 .....	Multiply the sum from Step 4 times the producer's share in the 2004 crop to determine the producer's 2004 BQL.

(d) The BQL for producers of cigar filler and binder tobacco is established by years, as follows:

(1) The 2002-crop year BQL for cigar filler and binder tobaccos is calculated as follows:

Step	Calculation
1 .....	Multiply the 2002 farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 to get the 2004 farm base pounds total.
2 .....	Multiply any 2002 special tobacco combination acres times the 2002-equivalence factor of 1.000.
3 .....	Multiply the sum from Step 2 times the farm's average yield for 2001, 2002, and 2003 to get the 2002 farm special tobacco combination pounds total.
4 .....	Add the sum from Step 1 to the sum from Step 3 to get the 2004 farm BQL total.
5 .....	Multiply the sum from Step 4 times the producer's share in the 2002 crop to get the producer 2002 BQL.

(2) The 2003-crop year BQL for cigar filler and binder tobaccos is calculated as follows:

Step	Calculation
1 .....	Multiply the 2002 farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 to get the 2003 farm base pounds total.
2 .....	Multiply any 2003 special tobacco combination acres times the 2003 BQL adjustment factor of 0.8929.

Step	Calculation
3 .....	Multiply the sum from Step 2 times the farm's average yield for 2001, 2002, and 2003 to get the 2003 farm special tobacco combination pounds total.
4 .....	Add the sum from Step 1 to the sum from Step 3 to get the 2003 farm BQL total.
5 .....	Multiply the sum from Step 4 times the producer's share in the 2003 crop to get the producer 2003 BQL.

(3) The 2004-crop year BQL for cigar-filler and binder tobaccos is calculated as follows:

Step	Calculation
1 .....	Multiply the 2002 farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 to get the 2004 farm base pounds total.
2 .....	Multiply any 2004 special tobacco combination acres times the 2004 BQL adjustment factor of 0.9398.
3 .....	Multiply the sum from Step 2 times the farm's average yield for 2001, 2002, and 2004 to get the 2003 farm special tobacco combination pounds total.
4 .....	Add the sum from Step 1 to the sum from Step 3 to get the 2004 farm BQL total.
5 .....	Multiply the sum from Step 4 times the producer's share in the 2004 crop to get the producer 2004 BQL.

(e) The BQL's for producers of all kinds of tobacco other than burley, flue-cured and cigar filler and binder, are established by year, as follows.

(1) The 2002-crop year BQL's for these kinds of tobaccos are calculated as follows:

Step	Calculation
1 .....	Multiply the 2002 farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 to get the 2002 farm base pounds total.
2 .....	Multiply any 2002 special tobacco combination acres times the farm's average yield for 2001, 2002, and 2003 to get the 2002 special tobacco combinations pounds total.
3 .....	Add the sum from Step 1 to the sum from Step 2.
4 .....	Multiply any 2002 acres leased to or from the farm times the farm's average yield for 2001, 2002, and 2003 to get the 2002 lease pounds total. Then, to the sum from either: (i) Step 3, add pounds leased to the farm to get the farm 2002 BQL total (ii) Step 3, subtract pounds leased from the farm to get the farm 2002 BQL total.
5 .....	Multiply the result from Step 4 times the producer's share in the 2002 crop to get the producer 2002 BQL.

(2) The 2003-crop year BQL's for these kinds of tobaccos are calculated as follows:

Step	Calculation
1 .....	Multiply the 2002 farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 to get the 2003 farm base pounds total.
2 .....	Multiply any 2003 special tobacco combinations acres times the applicable 2003 BQL adjustment factor: (i) Fire-cured (type 21)—1.0000 (ii) Fire-cured (types 22–23)—.980392 (iii) Dark Air-cured (35–36)—.952381 (iv) Virginia Sun-cured (type 37) 1.0000
3 .....	Multiply the sum from Step 2 times the farm's average yield for 2001, 2002, and 2003 to get the 2003 farm special tobacco combination pounds total.
4 .....	Add the sum from Step 1 to the sum from Step 3.
5 .....	Multiply any 2003 acres leased times the applicable 2003 BQL adjustment factor: (i) Fire-cured (type 21) 1.0000 (ii) Fire-cured (types 22–23)—.980392 (iii) Dark Air-cured (35–36)—.952381 (iv) Virginia Sun-cured (type 37) 1.0000
6 .....	Multiply the sum from Step 5 times the farm's average yield for 2001, 2002, and 2003 to get the 2003 lease pounds total.
7 .....	To the sum from Step 4 either: (i) Add pounds from Step 6 leased to the farm to get the farm 2003 BQL total (ii) Subtract pounds from Step 6 leased from the farm to get the farm 2003 BQL total.
8 .....	Multiply the sum from Step 7 times the producer's share in the 2003 crop to get the producer 2003 BQL total.

**Commodity Credit Corporation, USDA**

**§ 1463.108**

(3) The 2004-crop year BQL's for these kinds of tobaccos are calculated as follows:

Step	Calculation
1 .....	Multiply the 2002 farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 to get the 2004 farm base pounds total.
2 .....	Multiply any 2004 special tobacco combinations acres times the applicable 2004 BQL adjustment factor: (i) Fire-cured (type 21) 1.0000 (ii) Fire-cured (types 22–23)—.951837 (iii) Dark Air-cured (35–36)—.94264 (iv) Virginia Sun-cured (type 37) 1.0000
3 .....	Multiply the sum from Step 2 times the farm's average yield for 2001, 2002, and 2003 to get the 2004 farm special tobacco combination pounds total.
4 .....	Add the sum from Step 1 to the sum from Step 3.
5 .....	Multiply any 2004 acres leased times the applicable 2004 BQL adjustment factor: (i) Fire-cured (type 21) 1.0000 (ii) Fire-cured (types 22–23)—.951837 (iii) Dark Air-cured (35–36)—.92464 (iv) Virginia Sun-cured (type 37) 1.0000
6 .....	Multiply the sum from Step 5 times the farm's average yield for 2001, 2002, and 2003 to get the 2004 lease pounds total.
7 .....	To the sum from Step 4 either: (i) Add pounds from Step 6 leased to the farm to get the farm 2004 BQL total (ii) Subtract pounds from Step 6 leased from the farm to get the farm 2004 BQL total.
8 .....	Multiply the sum from Step 7 times the producer's share in the 2004 crop to get the producer 2004 BQL total.

**§ 1463.107 Payment to eligible quota holders.**

(a) The total amount of contract payments that may be made to an eligible quota holder shall be the product obtained by multiplying:

\$7.00 per pound × the BQL for the quota holder as determined under § 1463.105 for each kind of tobacco

(b) During each of the fiscal years 2005 through 2014, CCC will make a payment to each eligible quota holder in an amount equal to 10 percent of the total amount due under a contract entered into under this subpart, except that in the case an application was filed after June 17, 2005, the applicant will receive only the TTPP payments that have not been made as of the date the contract is approved. However, in order for the contract participant to receive the 2005 TTPP payment an application to enter into a TTPP contract must be filed no later than June 17, 2005. CCC may, in its discretion, extend any deadline set forth in this paragraph. However, CCC will make the FY 2005 payment between June and September of 2005, and subsequent payments will be made in January, to the extent practicable, of each FY.

**§ 1463.108 Payment to eligible tobacco producers.**

(a) Subject to paragraph (b) of this section, the total amount of contract payments that may be made to an eligible tobacco producer shall be the product obtained by multiplying:

\$3.00 per pound × the BQL for the producer determined under § 1463.106 for each kind of tobacco

(b) Payments to an eligible producer shall be equal to:

(1) For an eligible producer that produced tobacco that was marketed or considered by CCC as planted under a marketing quota in all of the 2002, 2003, and 2004 marketing years, 100 percent of the rate specified in paragraph (a) of this section;

(2) For an eligible producer that produced tobacco that was marketed or considered by CCC as planted under a marketing quota in any two of the 2002, 2003, and 2004 marketing years, 2/3 of the rate specified in paragraph (a) of this section; and

(3) For an eligible producer that produced tobacco that was marketed, or considered by CCC as planted under a marketing quota in any one of the 2002, 2003, and 2004 marketing years, 1/3 of the rate specified in paragraph (a) of this section.
